EDUCATION

Bachelor of Engineering: Software Engineering

Seneca Polytechnic

January 2023 - September 2026

North York, ON

EXPERIENCE

Systems Development Engineer Intern

Kubetools Technologies Inc.

January 2026 - April 2026

- Built a multilingual RAG system from scratch for transcript search and retrieval, including the ingestion, chunking, embedding, and vector storage workflow.
- Developed Python workflows for collecting and extracting data from YouTube metadata, transcript files, and structured output datasets.
- Worked on transcript review and replacement workflows using a FastAPI backend and TypeScript/React frontend interface, with scaled database-backed operations.
- Performed end-to-end UI testing for KubeSling across dashboard, endpoint creation, endpoint details, billing, settings, and support flows, and documented benchmarking results and performance thresholds.

Frontend & UI/UX Intern

Inspired Tech & Business Solutions

May 2025 - August 2025

- Improved mobile product usability by about 30% through iterative testing, wireframes, interactive prototypes, and high-fidelity designs in Figma, while maintaining brand consistency across the product experience.
- Developed responsive landing pages and product features from scratch using React, Tailwind CSS, Bootstrap, and JavaScript, translating designs into production-ready code.
- Collaborated with frontend and backend teams to deliver responsive, user-friendly interfaces, ensured accessibility compliance with WCAG, and optimized usability across devices and platforms.
- Presented design concepts to stakeholders, iterated quickly based on feedback, and maintained documentation for design systems and consistency across projects.

PROJECTS

parkingTO 📍 | *React.js, Node.js, Express.js, Axios*

- Built a full-stack parking locator with a map-first search flow and nearby lot discovery, using React.js, Node.js, Express.js, Axios, and Google Maps for location context.
- Integrated the React frontend with the backend layer through API-driven requests to support stable, scalable location and route discovery experiences as traffic and features scale.

AstrOracle 📍 | *React.js, TypeScript, Three.js*

- Built an interactive React and TypeScript interface with a 3D globe so users could inspect impact zones, compare simulated outcomes, and understand response strategies.
- Visualized meteor-impact scenarios using real NASA and USGS datasets for impact analysis and response planning, making complex information easier to explore.

Portfolio v.2 📍 | *Next.js, React 19, TypeScript 5, Tailwind CSS v4, Framer Motion*

- Built a personal portfolio with Next.js, React 19, TypeScript 5, Tailwind CSS v4, and Framer Motion, emphasizing modern frontend tooling, performance, and UX.
- Used static site generation for fast page loads and strong SEO, and structured the site around a single-page tabbed layout with client-side switching for a smoother browsing experience.

EXTRA CURRICULARS AND ACHIEVEMENTS

- Hackathons & Competitions: NASA Space Apps Challenge 2025 and Seneca Hackathon 2023.
- Certification: Docker Foundations Professional Certificate - Docker, Inc (December 2025).
- Certification: Ultimate RAG Bootcamp Using Langchain, LangGraph & LangSmith - KRISHAI Technologies Private Limited (January 2026).
